

Quick Guide

Unicorn10
4G Full Frequency

Safety Instructions

Ordinary mobile phones can not meet the explosion-proof requirements in dangerous places, so they are not allowed to be used in dangerous places that may cause explosion. The areas that may cause explosion include: fuel area (such as under the deck of a ship, transportation and storage facilities for fuel or chemical products), places with chemical substances or particles (such as particles, dust or metal powder) in the air, such as gas stations, oil depots, etc.

The Industrial Intrinsically Safe Smartphone Unicorn10 produced by Beijing Dorland has been certified by the national explosion-proof certification authority, and meets the requirements of GB3836.1-2010 explosive environment Part 1: General requirements for equipment, GB3836.4-2010 explosive environment Part 4: equipment protected by intrinsically safe "I" and GB12476.1-2013 electrical equipment for combustible dust environment Part 1: General requirements and GB12476.4-2010 / IEC61241-11: 2005 electrical equipment for combustible dust environment Part 4: intrinsic safety "iD" standard requirements. It is suitable for zone 1, zone 2, zone 21 and zone 22 of explosion hazard field.

Basic parameters

Explosion-proof grade: Ex ib IIC T4 Gb / Ex ibD 21 T130°C
Certification No.: CCRI 20.2303
Protection grade: IP68

Safety Warning

Safety performance of Industrial Intrinsically Safe Smartphone Unicorn10 can be guaranteed only in strict accordance with the instructions in this section. Please read the instruction carefully before using. If you have any questions, please contact the manufacturer immediately.

Safety Rules

Safety performance of Industrial Intrinsically Safe Smartphone Unicorn10 base the users obey the following rules.

- The battery for Unicorn10 is made by the manufacturer specializing in the production of batteries. Only the original battery meets the intrinsically safe requirements. Any other non-original batteries will result in the loss of phone explosion-proof performance. Please make sure to use the original battery. For battery replacement, please contact Beijing Dorland System Control Technology Co., LTD.. The battery for Unicorn10 is Ex Battery 042 8000mAh explosion-proof polymer battery.
- Please use the original charger when recharge battery, and make sure in the safe areas. The maximum charge voltage is 4.4V.
- Don't replace battery for Unicorn10 in explosion hazardous areas.
- Unicorn10 can not be used in explosion danger zone 0.
- Don't use headset, data cable plug devices in the explosion hazardous areas.
- Don't use the flash function in explosion hazardous areas.
- Don't use the vibration function of the phone in explosion hazard areas.
- Please keep away the high-temperature region when using Unicorn10.

Failure and damage processing

If Unicorn10 has lost its safety performance, please stop using in explosion hazardous areas, and ship the failure phones back to the manufacturer for testing.

Situations that may cause failure of Unicorn10 explosion-proof performance include the following ones:

- The phone shell is damaged;
- Storage place does not meet the storage conditions;
- Damaged during transport;
- Explosion-Proof mark is unrecognized;
- Other functions fail.

Precautions

● Please keep the product away from the magnetic equipment. The radiation of the product may erase the information stored on the magnetic equipment.

● Please do not place the product, battery and charger in appliances with strong electromagnetic field, such as induction cooker and microwave oven, otherwise it may cause circuit failure, fire or explosion.

● Do not place the product, battery and charger in high temperature area or low temperature area, otherwise it may cause the product, battery and charger failure, fire or explosion.

● When charging the battery, try to keep the ambient temperature between 0 °C and 40 °C. The working temperature of the battery is kept between - 20 °C and 60 °C. If the battery is placed in an overheated or supercooled area, the capacity and service life of the battery may be reduced. When the temperature is lower than 0 °C, the performance of the battery is especially limited.

● When the product touches the ear, please do not turn it on or off, so as not to affect human health.

● In order to comply with the RF leakage regulations, when you wear the product or use its data function, please keep the distance between the antenna and your body at least 1 inch (2.5cm).

● The signal interference of the product may affect the adjacent TV, radio or computer.

● Please comply with the international specification of RF radiation and use the product accessories specified by our company.

● When using this product, please abide by the relevant laws and regulations, and respect the privacy and legitimate rights of others.

12

Using the touch screen

1. Click function: You can select an icon or option by using click function. Such as click phone icon to open the dialing pad on the main screen.

2. Click twice continuously: zoom in and out function. For example, when viewing a picture or web page, you can click twice continuously to enlarge or shrink the picture.

3. Long press function: You can long press the current user interface, icon or input fields for more operating options.

For example:

Long press an icon in the main menu, the icon will be moved to the home screen;

Long press the home screen space, the wallpaper can be changed.

Android Tips

1. Screen Snapshots: If you want to capture a snapshot of the screen by a shortcut, please try to push the power key and the volume—button at the same time until you hear a click sound. After the operation is completed the image will be found in the phone gallery.

2. The power saving secrets of Android phones:

Turn off the unnecessary software process: long press HOME button, select the icon and slide left until it disappears;

Turn down screen brightness: If you always use your phone, you can turn down the brightness a bit, so you can extend the battery standby time;

Some settings (such as WLAN, GPS, and network data) can be turned off if not required. These functions will consume power if turned on.

9

● Before cleaning and maintenance, please turn it off. If it is still connected to the charger, you should unplug the charger from the power outlet, and disconnect charger and phone to avoid electric shock, short-circuit of battery or charger.

● Do not disassemble the phone. Only authorized institutions are allowed to repair this product.

Safety warning

● Please turn it off before the phone is close high-precision control electronic equipment, or it may cause electronic equipment failure.

● Equipments will be influenced by the phone include: audiphones, pacemakers, fire alarms, automatic doors and other automatic control equipments. Users who are using electronic medical auxiliary equipment should confirm whether the radio wave will influence it or not with service center of the equipment.

● Pacemaker manufacturers recommend that the distance between the phone and a pacemaker should be kept at least 15 cm to avoid potential interference. Please do not carry the phone in your breast pocket; Please use the different side ear with pacemaker to answer calls to minimize the potential interference.

● Please do not bring the phone into the operating room, intensive care unit (ICU) or coronary care unit (CCU).

● In medical facilities where using mobile phones is prohibitive, please follow their instructions and regulations.

● Please pay attention to tone, volume, vibrate settings of the phone, so as not to influence heart disease patients.

● In inflammable and explosive areas, do not remove, install or charge the battery, so as not to cause explosion or fire.

13
